

Rittal – The System.

Faster – better – everywhere.

▶ WM Slope Top Wallmount Enclosures

Rittal WM slope top enclosures are designed for food/beverage and pharmaceutical applications or any environment where sanitation concerns require frequent washdowns. The 20° overhanging sloped roof prevents standing water from accumulating on top of the enclosure and door opening. NEMA 4X protection ratings are ensured through a secure locking system, foamed in-place gasket and knife-edge perimeter. WM enclosures are readily available in all of the most popular sizes, protection categories and configurations - including universal disconnect cutout - and a full range of accessories.

For further details, go to www.rittal.us.

- One-piece welded stainless steel body
- Available 304 and 316L stainless steel
- Flange-trough collar opening channels liquids and dust away from enclosure gasket and enclosure interior
- Left-hand hinged door

- Blind riv-nuts allow for secure mounting
- Foamed-in-place gasket
- Zinc-plated mounting panel standard
- 20-degree sloped roof that overlaps the door
- Enclosures less than 20" in height have one ¼ turn latch
- Enclosures 20 - 40" in height have two ¼ turn latches
- Enclosures greater than or equal to 42" in height have a 3-point latching L-handle
- Disconnect enclosures have a 2 or 3-point latching L-handle
- Slope top and disconnect enclosures have UL/cUL Type 1, 3R, 12, 4, 4X protection ratings
