

# Rittal Has More To Offer.

Automated products can increase the efficiency of your modification operations.

With the purchase of your Perforex BC machine, your business has taken a giant step forward in automating your modification operations. The next step is looking beyond the machining process to see what other products Rittal Automation Systems can offer that will enhance your process efficiency.

## Material handling products

Rittal Assembly frames are mobile and ergonomic for wiring panels and enclosures. Assembly tables are adjustable to accommodate large mounting panels. And, Rittal storage stillage enable secure, protected handling and transportation of enclosure components.

## Cable duct and DIN rail cutting

No lengthy times spent on measuring and cutting, and no complicated handling. Secarex cutting center is convenient to use and cuts wiring ducts, cable duct covers and support rails to length quickly, precisely and reliably.

## Semi-automatic wire processing

Rittal wire processing machines automatically cut, strip and install ferrules. In addition, a variety of cross-section wire sizes can be used with complete control over length, strip length and size of ferrules.

## Maintenance program

Rittal is there to ensure your Perforex machine is running at peak performance to avoid potential downtime and costly, major repairs.
